What is a Tribute Fund?

A Tribute Fund is a way of cherishing the memory of a loved one. It allows you, your family and friends, to create something positive out of a time of great sadness.

A Tribute Fund helps to provide a focus for events like birthdays, anniversaries and Christmas, which can bring back many painful as well as precious memories.

You might wish to make ongoing donations to mark birthdays and other special dates, to take part in events organised by the Charity or you could organise your own event in memory of your loved one.

The money you raise is allocated to your named Tribute Fund, and you can request an update on how much your fund has raised by contacting us directly at any time.

Online tributes

The fund can also be operated on the internet, enabling friends to add special messages, upload photographs and share their favourite memories of a loved one.

We do this in partnership with www.muchloved.com

You can set up a Tribute Fund for Royal Manchester Children's Hospital Charity through the Much Loved website as we are one of their partner charities.

Setting up a Tribute Fund on the Much Loved website is completely free of charge and will be hosted for free for 10 years.

The benefits

Supporting Royal Manchester Children's Hospital Charity through a Tribute Fund enables us to make life a little bit easier for children and their families who use the hospital. We do this by supporting projects like:

- creating a more child-friendly environment in the hospital
- supporting medical research projects to improve our understanding of children's illnesses and how best to treat them
- buying specialist equipment to enable our staff to offer better – faster or less invasive - treatment to our young patients

Your ongoing support means that we can ensure the very best treatment for our young patients and better facilities to help their families at what can be a very difficult time.

How do I set one up?

To set up a Tribute Fund, simply fill in the registration form on the reverse of this leaflet and send it to:
